

Main Page:

The sketch shows a web page layout with a header section containing 'Logo U Tutor' on the left and 'Welcome !' on the right. Below the header, there are two main content areas. The first area contains a box with the text 'Become a tutor' and an orange line extending to the right. The second area contains a box with the text 'Sign In / Sign Up.' and a vertical orange line extending downwards.

Become a tutor on click:

Logo UTutor.

Welcome!

When student signed-in  $\Rightarrow$  to searching page:

The sketch shows a web application layout with the following components:

- Header:** A horizontal bar divided into three sections: "Logo UTutor.", "MyProfile", and "Welcome, xxx".
- Form Section:** Labeled "Field of Interest:", it contains three input fields: "Location:", "username", and a field with two dashes "--".
- Results Section:** Labeled "Results:", it contains a list of items, each in a box. The first two are "Tutor 1" and "Tutor 2". A red arrow points to the "Tutor 1" box.
- Map Section:** Labeled "Google Map.", it contains a rectangular area representing a map with several small dots indicating locations.

When a search result (tutor) is selected:

Logo	UTutor	MyProfile	Welcome xxx.
Tutor username:		Rate:	★★★★★
Field of Interest:			
About:			<div>Chat Now</div>
Ratings:			
Comments:			
Location:	<div>Google Map</div>		

When tutor signed in:

<input type="checkbox"/> Ututor.	MyProfile   Welcome: XXX
Message	→ onclick display msg
Profile	→ onclick to change profile info.
